IBM Press. Paperback. Condition: New. This item is printed on demand. 256 pages. A Practical, Start-to-Finish Approach to Managing, Evolving, and Transforming Legacy IT Systems For every IT executive, manager, architect, program leader, project leader, and lead analyst Richard and Kevin introduce us to a reality thats often neglected in our industry: the problem of evolving legacy systems, a domain they call Brownfield development. The authors identify the root of the problem as that of complexity, and offer an approach that focuses on the fundamentals of abstraction and efficient communication to nibble at this problem of transformation bit by bit. As the old saying goes, the way you eat the elephant is one bite at a time. Richard and Kevin bring us to the table with knife and fork and other tools, and show us a way to devour this elephant in the room. Grady Booch, IBM Fellow, co-creator of UML Most organizations in the 21st century have an existing, complex systems landscape. It is time that the IT industry face up to the reality of the situation and the need for new development methods and tools that address it. This book describes a new approach to the development of future systems: a structured approach that recognizes the challenges of Brownfield development, is based on engineering principles, and is supported by appropriate tooling. Chris Winter, CEng CIP FBCS FIET, IBM Fellow, Member of the IBM Academy of Technology Most conventional approaches to IT development assume that youre building entirely new systems. Today, Greenfield development is a rarity. Nearly every project exists in the context of existing, complex system landscapes--often poorly documented and poorly understood. Now, two of IBMs most experienced senior architects offer a new approach that is fully optimized for the unique realities of Brownfield development. Richard Hopkins and...
