DIY Solar Charger For Electric Car: Learn To Install Own Solar Panel Charger To Power Your Car Electric cars have been in existence for many years. However, it is only in the last few that they seem to have exploded in popularity. Much of this can be attributed to Tesla; which has become a household name and forced major vehicle manufacturers to catch up with their technology. The result is that electric cars have become cheaper, more efficient and can drive further. This makes them an attractive option for many people. The issue is the cost of running an electric car; whilst you will not have fuel costs you will see an increase in your electricity bill. This will be directly related to the number of miles you complete. One way to negate this cost and improve the attraction of these vehicles is to create your own DIY solar charger for electric cars. This is actually very simple and can be done as a stand-alone system or as part of a household electric supply; greatly reducing your bills. To find out how you can achieve this read the following book! It contains: An introduction to the power of the sun and its use in powering things for centuries. You will also learn a little about the development of the electric car. Which systems are available to create a solar charger for your car and how to choose the right one. Methods to homestead the fresh water resources like water wells Solar panels on your car; the reality and practicality of this today and in the future.
